

LAB 2

Agile Backlog Creation & Sprint Simulation in Jira

Problem Statement 4 — Student Project Portfolio & Showcase App

Student Detail Information	Details
Name	Khushi Patel
SRN	PES1UG24AM134
Section	C
Semester	5
Jira Project	Student Project Portfolio & Showcase App
Individual Epic	Project Evaluation
Epic Key	SCRUM-13
Sprint	Sprint 1

1. OBJECTIVE

To convert the functional requirements and the individual focus use case from Lab 1 into Agile backlog items in Jira, organize them under the Project Evaluation Epic, prioritize and estimate the user stories using story points, simulate sprint execution, and analyse sprint progress using the Burndown Chart.

2. EPIC — PROJECT EVALUATION

Field	Details
Epic Key	SCRUM-13
Epic Name	Project Evaluation
Assignee	Khushi Patel
Related Use Case	UC-03 — Evaluate Project
Primary Actor	Panel Judge
Priority	High
Sprint	Sprint 1

Spaces / [Student Project Port...](#) / [SCRUM-13](#)

Project Evaluation

Description
Enables panel judges to digitally evaluate submitted student projects using an evaluation rubric and record the evaluation results.

Figure 1. Jira Epic — Project Evaluation (SCRUM-13), showing the Epic details, priority, and association with the Project Evaluation user stories.

3. REQUIREMENT-TO-BACKLOG MAPPING

Lab 1 / UC-03 Requirement or Flow	Jira User Story	Priority	Story Points	Sprint
UC-03 Steps 4–5 — Select project and view showcase information and submitted artifacts	SCRUM-14 — View Submitted Project Information and Artifacts	High	3	Sprint 1
UC-03 Step 6 — Display applicable digital evaluation rubric	SCRUM-15 — Access Digital Evaluation Rubric	High	3	Sprint 1
UC-03 Steps 8–9 — Enter required rubric scores and validate required fields	SCRUM-18 — Enter and Validate Evaluation Scores	High	5	Sprint 1
UC-03 Step 10 — Submit completed evaluation	SCRUM-16 — Submit Completed Evaluation	High	3	Sprint 1
UC-03 Steps 11–12 — Record evaluation and provide confirmation	SCRUM-17 — Record Evaluation and Show Confirmation	High	3	Sprint 1

The five Project Evaluation stories have a combined estimate of 17 story points. They are all associated with Epic SCRUM-13 and were planned for Sprint 1.

4. JIRA BACKLOG AND STORY POINTS

The Project Evaluation Epic contains five User Stories. Story points follow the Fibonacci-based estimation approach used in the Jira lab. The estimates reflect the relative complexity of viewing submitted material, accessing the rubric, entering and validating scores, submitting the evaluation, and recording the result.

Work	Pri...	As...	Status
 SCRUM-14 View Submitted Project Information and Artifacts	 H.	 K	Done ▾
 SCRUM-15 Access Digital Evaluation Rubric	 H.	 K	Done ▾
 SCRUM-16 Enter and Validate Evaluation Scores	 H.	 K	Done ▾
 SCRUM-16 Submit Completed Evaluation	 H.	 K	Done ▾
 SCRUM-17 Record Evaluation and Show Confirmation	  H.	 K	Done ▾

Figure 2. Jira Sprint 1 Backlog showing the Project Evaluation User Stories, their priorities, Epic association, and story-point estimates.

5.1 SCRUM-14 — View Submitted Project Information and Artifacts

User Story: As a panel judge, I want to view the submitted project information and artifacts, so that I can review the project before evaluating it.

Acceptance Criteria:

- The judge can select a submitted project for evaluation.
- The project's showcase information is displayed.
- Submitted project artifacts are available for review.
- The information required for evaluation can be viewed before scores are entered.

Priority	Story Points	Sprint	Status

Figure 3. Jira User Story — SCRUM-14: View Submitted Project Information and Artifacts, showing the user story, priority, story points, Epic association, and sprint assignment.

5.2 SCRUM-15 — Access Digital Evaluation Rubric

User Story: As a panel judge, I want to access a digital evaluation rubric, so that I can evaluate the submitted project using defined criteria.

Acceptance Criteria:

- The applicable evaluation rubric is displayed.
- The rubric contains the required evaluation criteria/fields.
- The judge can use the rubric while reviewing the submitted project.

Priority	Story Points	Sprint	Status
High	3	Sprint 1	Done

The screenshot displays a Jira User Story page for SCRUM-15. The title is "Access Digital Evaluation Rubric". The description reads: "As a panel judge, I want to access a digital evaluation rubric, so that I can evaluate the submitted project using defined criteria." The page includes sections for Subtasks, Linked work items, and Confluence content. A details sidebar on the right shows the following information: Assignee: Khushi Patel, Parent: SCRUM-13 Project Evaluation, Sprint: Add sprint, Priority: High, Labels: Add labels, Due date: Add due date, Team: Add team, Start date: Add date, Story point estimate: 3, and Reporter: Khushi Patel. The status is "Done".

Figure 4. Jira User Story — SCRUM-15: Access Digital Evaluation Rubric, showing the user story, priority, story points, Epic association, and sprint assignment.

5.3 SCRUM-18 — Enter and Validate Evaluation Scores

User Story: As a panel judge, I want to enter the required rubric scores and have the system validate the evaluation fields, so that I can submit a complete and valid evaluation.

Acceptance Criteria:

- The judge can enter scores for required rubric fields.
- The system checks that all required evaluation fields are completed.
- Incomplete required fields prevent submission.
- The system indicates incomplete fields so that the judge can provide the missing information.
- A complete evaluation passes validation and can proceed to submission.

5.4 SCRUM-16 — Submit Completed Evaluation

User Story: As a panel judge, I want to submit my completed evaluation, so that my scores and comments are recorded for the submitted project.

Acceptance Criteria:

- The judge can submit the evaluation after required fields are completed.
- The system accepts the evaluation only after validation is successful.
- The submitted evaluation is sent for recording.

5.5 SCRUM-17 — Record Evaluation and Show Confirmation

User Story: As a panel judge, I want my submitted evaluation to be recorded and receive a confirmation, so that I know my evaluation has been successfully submitted.

Acceptance Criteria:

- The submitted evaluation is recorded by the system.
- The evaluation result is associated with the submitted project.
- A submission confirmation is displayed to the judge.

Figure 7. Jira User Story — SCRUM-17: Record Evaluation and Show Confirmation, showing the user story, priority, story points, Epic association, and sprint assignment.

6. SPRINT 1 EXECUTION

Sprint	Sprint Dates	Sprint Goal	Individual Contribution
SCRUM Sprint 1	03 Oct 2026 – 10 Oct 2026	Complete the initial project showcase and project evaluation user stories.	SCRUM-14, SCRUM-15, SCRUM-18, SCRUM-16 and SCRUM-17 — 17 story points

The five Project Evaluation stories were placed in Sprint 1 and moved through the Jira workflow from To Do to In Progress and then to Done. Sprint 1 was completed after the planned work was finished.

Completed work items View in All work navigator

Key	Summary	Work type	Epic	Status	Assignee	Story points
SCRUM-14	View Submitted Project Information and Artifacts	Story	Project Evaluation	Done		3
SCRUM-15	Access Digital Evaluation Rubric	Story	Project Evaluation	Done		3
SCRUM-16	Submit Completed Evaluation	Story	Project Evaluation	Done		3
SCRUM-17	Record Evaluation and Show Confirmation	Story	Project Evaluation	Done		3
SCRUM-18	Enter and Validate Evaluation Scores	Story	Project Evaluation	Done		5

Figure 8. Jira Sprint 1 Completed Work Items showing SCRUM-14, SCRUM-15, SCRUM-18, SCRUM-16, and SCRUM-17 in Done status.

7. BURNDOWN CHART

The Sprint 1 Burndown Chart uses story points as the estimation field. The Project Evaluation stories contributed 17 story points to the sprint. The chart should be interpreted together with the complete team sprint workload shown in Jira.

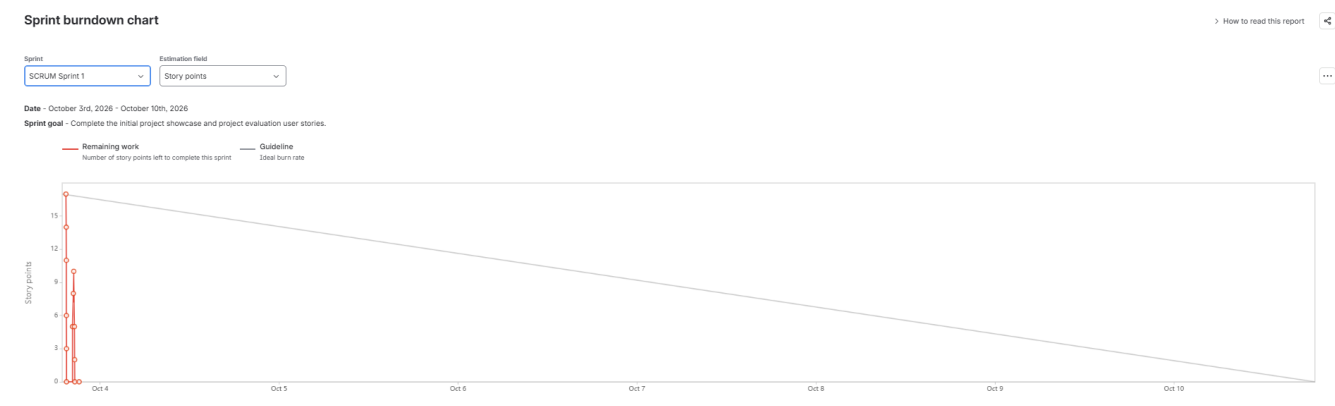

Figure 9. Jira Burndown Chart for SCRUM Sprint 1 showing the progress of the sprint workload and remaining story points over the sprint duration.

8. REFLECTION

1. Did your estimations reflect the actual effort?

Yes, the estimates were reasonable relative to the scope of the five Project Evaluation stories. The stories for viewing submitted information and accessing the rubric were assigned 3 points each because they involve focused review/display functionality. Entering and validating evaluation scores was assigned 5 points because it includes data entry, required-field validation, incomplete-field handling, and the validation flow. Submitting the evaluation and recording the result with confirmation were each assigned 3 points because they represent focused completion and persistence/confirmation steps.

2. Was your backlog well-prioritized?

Yes. All five Project Evaluation stories were marked High priority because they directly support the core UC-03 workflow for a panel judge. The stories cover the sequence from reviewing the submitted project and rubric through entering and validating scores, submitting the evaluation, and receiving confirmation.

3. How did your simulated sprint align with your plan?

The five planned Project Evaluation stories were placed in Sprint 1 and completed through the Jira workflow. Each story was moved from To Do to In Progress and then to Done. Sprint 1 was subsequently completed in Jira, and the Burndown Chart was captured as evidence of sprint progress.

4. What insights did the burndown chart give about your team's capacity?

The Burndown Chart provided a visual view of how the planned sprint workload decreased over the sprint. For my individual Project Evaluation contribution, the planned workload was 17 story points. The chart should be read as a team-level sprint measure, so it reflects the combined workload of all work items included in Sprint 1, not only my five stories. The completed sprint and the reduction in remaining work indicate that the planned Sprint 1 work was completed.

9. CONCLUSION

Lab 2 converted the Lab 1 project-evaluation workflow into an Agile Jira backlog under the Project Evaluation Epic (SCRUM-13). The Epic contained five User Stories covering project/artifact review, access to the digital evaluation rubric, score entry and validation, evaluation submission, and recording with confirmation. The stories were prioritized as High, estimated using Fibonacci-based story points, assigned to Sprint 1, and completed through the Jira workflow. The Jira Epic, backlog, individual story records, completed-work evidence, and Burndown Chart provide evidence of Agile planning and sprint execution.
